Oleofuels 2017 is the progression of ACI's highly successful European Biodiesel series of events which ran from 2008-2013. The change of name reflects the fact that the event will now cover all fuels made from oils & fats including biodiesel, HVO & bio jet as well as take a more global view which is key especially when it comes to certain feedstocks.

The two day event will give you an insight to the industry's latest policy evaluations and, while focusing largely on Oleofuels markets in Europe, will also concentrate on updates and future forecasts on supply and demand of the key Oleofuels markets. By highlighting the sector's current major challenges and opportunities the conference will provide a holistic outlook on market trends and drivers.
